

Thermally Fused Laminates

Right Design. Designed Right.

Arclin's E-Gen®-designated decorative overlays combine sought-after designs, high performance and sustainable engineering — inside and out. And our unparalleled surfacing expertise means you can choose from one of our more than 150 quality designs — or we'll work with you to develop your next customized green TFL. For commercial, retail and residential interiors, schools, hospitals and more.

Specify

Arclin's E-Gen® Thermally Fused Laminates, or TFL, are:

- Available in more than 150 designs, including wood grains, textures, solids and more
- Customizable to meet design and manufacturing specifications
- Ultra low-emitting and may be available with Greenguard for Children & SchoolsSM certification
- May contribute to LEED EQ credit 4.4
- Manufactured in FSC® chain of custody-certified facilities. Ask about FSC-certified paper availability

What goes into our products makes yours green.

Arclin is an industry leader in surfaces technology and design. We've engineered an impermeable laminate — made with paper from sustainably harvested sources — that virtually eliminates air emissions from our E-Gen®-designated thermally fused laminates, or TFL.

Style and substance.

Order direct or through your supply chain partner. And specify **E-Gen® TFLs**.
